

Lagafors was established in 1964 and is specializing in industrial cleaning solutions and spray guns. The company has developed different system solutions and uses a wide range of equipment for industrial cleaning. Triggless spray gun is sold in about 50 countries around the world.

## TRIGGLESS - The Unique Spray Gun

Triggless is an entirely new type of spray gun with many unique features:

- **No trigger** - the opposing force to water-jet holds the flow valve in open position.
- **Ergonomic design** - minimises strain (RSIS) on hand, wrist, arm and shoulder.
- **Easy to handle** - with unlimited handling and operating positions.
- **Dead man's handle** - "fail safe" operation
- **Minimal recoil** - water-flow is straight line through the spray gun.
- **Ease of operation** - using either hand
- No trigger nor push buttons
- Completely **new design** and function concept
- With few moving parts, clean and smooth design service is easy with **low maintenance**
- Use of moulded impact resistant materials provides **safe and comfortable grip**
- Built in **swivel connection**

### TECHNICAL SPECIFICATIONS:

Max. pressure: 310 bar (4.500 psi)

Max. flow: 45 litre (12 US gallon) / minute

Max. temperature: 80C (176F)

Weight: 700 gram

Length: 240 mm including swivel connection

Material: Stainless steel + impact resistant plastic
